

June 2017 Vedic Astro Forecast PDF for subscribers

Here are some highlights of June:

- **Venus moves into Aries on May 31st** (and expands the number of potential Green Days, after 4.5 months opposite Jupiter!)
- **Mars moves into Gemini opposite Saturn through July 10th**, creating a new kind of day in the Calendars for the month.
- **Building Solar and Lunar Light from New Moon on May 25th through June 9th for everyone!** Be careful not to get over extended and over booked. Under book your social events for the middle of June, and you can then choose which events you want to attend closer to the event.
- **Good News: Ten Green Days in June!**

- **June Solstice marks the exact middle of the year.**

For health tips on how to work with each of these energies this month make sure to watch the monthly videos and **join me June 3 and June 6th** for a LIVE session with me, and ask any questions you want about the astrology of the month or Conscious Calendars.

I am sharing quick ways to shift mind states, clear blockages and methods to keep the abundance flowing during the month of June.

FREE GROUP MEETINGS WITH KATHLEEN!

1. **Clear Difficulties and understand the astrology of the month, including how to work with Saturn and Mars on September 3rd at 8:30 am Pacific Time.**

Event and Replay is here:

<http://events.iteleseminar.com/?eventID=98512878> Listen to the recordings afterwards (Same link ID). Look for the links to the class, and the recordings in your Video area and in your monthly newsletter.

2. **Tuesday June 6th 9 am Pacific Time on a Green Day:** Kathleen is giving on Astrology of Venus, Mercury and Jupiter and **how the Green Days have changed and how to call in prosperity and abundance on any day!**

JUNE SOLSTICE – Celebrate and Capture the Light wherever you live!

Solstice is June 20 at 9:24 pm PDT or June 21 at 12:24 am EDT or 2:24 pm AEST
Australia

LONGEST DAY OF THE YEAR IN THE NORTHERN HEMISPHERE

Different than June of 2016 when the full moon AND solstice occurred on the same day.

The light is beginning to return to those in the southern hemisphere, or we are celebrating the longest day of the year or celebrating the SUN on June Solstice in the northern hemisphere.

SOUTHERN HEMISPHERE SOLSTICE HEALTH TIP AROUND THE SHORTEST DAY OF THE YEAR FOR YOU:

Advice for southern hemisphere residents: The middle of June is the darkest time of the year for you, especially from June 9th – June 23rd. That time zone will bring the absolute lowest energy available to you in the year from June 21 – June 23rd.

To help anchor the light in the middle of your winter in southern hemisphere, I recommend St. John's shield which anchors the light within the plant and literally turns the oil red with its infusion. This incredible oil from one of my favorite companies (no affiliate link) is here: <http://store.fesflowers.com/florafusions-oils/st-john-s-shield-2-oz-or-4-oz.html> Find a place in the southern hemisphere to save on shipping which makes a St. John's Wort oil (this company's oil is incredible because they include flower essences and essential oil, as well as infused oil with St. John's Wort.)

Do not take the supplement or drink the tea unless you are being monitored by your doctor or health care provider.

(St. John's Shield topical oil can be used in December for those in the northern hemisphere.)

CELEBRATE

Wow! What a month of May. Now that Venus is no longer in Pisces (so the tug to indulge has decreased or to not workout, phew!) there are some incredible Green Days coming up in June and July. So, life can really start moving along!

The Lunar light and Solar Light are building at the same time in the northern hemisphere until June 9th. Then the days continue to lengthen through June Solstice.

☉ Full Moon in Scorpio June 9th

Swim in your intuition, build power through collaboration.

Today's full moon is to remind us that we can cultivate intuition EVERY day of the year.

This full moon might be giving you deep insights from your dreams. It is important to allow some personal quiet time on June 8 – 10 for yourself, that is unhooked from all stimulus (from listening to music, or media of any kind) and spend at least 10 minutes just being. Then you can journal for a few minutes, but let there be space before consuming anything like reading, writing or being engaged in something. Otherwise, the message from the deep ocean of your inner being cannot let its message bubble to the surface. Then see if you can try this habit daily!

Relax in or near water around this full moon. Since Scorpio is like an ocean of subconscious knowledge, let yourself float in the sea of possibility and see what answers or creativity emerges. (You might possibly even 'float' or visiting a sensory deprivation tank to help you unwind, and tap into deep meditative states.)

The building light and energy at this time of year, will have the gardens of those in the northern hemisphere bolting upward!

Collaboration is lighting up right now because Venus, Mercury and Mars are dancing opposite the Moon and this brings a special harnessing of light, action and care together that comes from a well- balanced community. Reach out to colleagues, **build something together!**

Build Intuition We know that spending at least 10 minutes a day in quiet contemplation develops intuition – that is established from Positive Psychology research. ([Want to know more about how building intuition builds luck? Check out Kathleen’s free ebook on Positive Happiness Habits.](#) Intuition is the third happiness building habit in the ebook because it helps you cultivate flow which is like a super food to the heart and mind.)

● **New Moon in Gemini at 10:30 pm Eastern Time EDT on Friday June 23rd or at 2:30 am UTC / 3:30 am BST London Time on Saturday June 24th.**

This New Moon is in a fierce and divinely discontent part of the heavens. Use this rough and tumble moon that likes to buck the system and do things their own way, to change something that has been bugging you for the past few months.

Change something related to YOU, do not focus on someone else.

This new Moon (called Ardra) has a **laser like energy** to it with the Sun, Moon, sunrise, Mercury and Mars all aligned within the same 10 degrees of sky! Not that is some intensity that comes with what is normally a quiet time of the lunar cycle (and normally a gentle new Moon).

ALIGNED ACTIONS: This section of sky calls for strong clearing actions, like attacking bad habits. You might want someone to come over to your house and enact a BIG, DEEP clean of your home or office. Get rid of things you have not used, get rid of food or snacks that do not support your health and vitality. (Get an accountability partner, so you can help each other.)

This is a no pussy footing around Moon, and with Mars adding fuel to the fire, opposite a Saturn in smoldering Sagittarius, you really want to use this laser focus while you have it to get rid of the old patterns or stuff.

This can be a hot-mess Moon too, but it’s calling is to survive and thrive despite the circumstances of life.

So, this New Moon helps you face the pain you might have been avoiding or allows you to grab your dark side and tug it into the light. Like a vampire which dissolves in the light, the actual clearing will be easier than the resistance you might have been having

www.ConsciousCalendars.com/mini-ccal

Copyright © 2017 Conscious Calendars

to just 'doing it' and getting rid of that bad habit.

Travel is definitely NOT recommended on this New Moon.

HEADS UP:

WATCH FOR ROUGH EDGES ON Saturn Mars DAYS IN JUNE through June 21 – These will coincide with "Purple Days" this month.

June 10, 11 & 12 Read here and see description below.

I have been sharing Purple days with everyone for over a year in both the monthly PDF and social media

reminders. Purple Days are the days when I have talked about the Moon being aligned with Saturn. A slowing down of a project, or an obstacles might appear on these days, which is different energy than typical Yellow Days, which are more prone to distractions and drama, or technology or commute issues.

In June, Purple Days are ALSO aligned with Mars, so there is an extra edge to these days, that began when Mars moved into Gemini on May 27th.

Be like Wonder Woman in June: A great image to use during June is to image you have a pair of Wonder Woman's bracelets of magical metal which repel any negativity that might be around you. At the same time, remember that THE MOST POWERFUL THING you can do in the midst of conflict is to be kind and loving.

You are not afraid to stand in Truth. Be powerful while you repel negativity by not feeding it. While on Green Days it is easier to access love, and connection and move things along.

Life is often a balance.

Health Tip: Mars' metal is copper.

You can also drink water first thing in the morning after it has set in a copper cup overnight. This is a way to charge and clear your body gently.

These are also good days for those who work in technology or engineering of any kind.

The science and technology planets of Saturn and Mars might bring out some unique problem solving and Eureka! Moments on these days through June 21.

The only thing to watch for is that Saturn and Mars do not get along too well, and they will be opposite each other through early July – so the days that the Moon aligns with these planetary forces will give those days more edge – June 10, 11 & 12 are those days this month.

Gemini and Sagittarius ascendants might need to watch their health more closely – and take extra care to prevent injuries. Supporting those people's digestion while not eating too much spicy food will be in order to maintain optimum health.

Scorpio Ascendants and Moons (in the Vedic System) might have some surprises this month which appear to destabilize them, AND now that Jupiter is direct, they can experience working toward that wealth (money making money for you) I have been speaking about for the past 4.5 months.

3. Prepare for **August, the eclipse month**, and **last two Mega Red Days** of the year! Download your Mega Red Day Report and look ahead to plan on keeping August 7/8 and August 21 really simple days.

The **total solar eclipse on August 21, 2017** traverses across the entire United States. The eclipse days are called Mega Red Days, and the Eclipse or Mega Red Day report teaches you how to use these intense days to turn things around for yourself. You can use the days to reverse bad habits IF you know how to use the energy.

4. Then TWO major shifts come in September 2017. Jupiter changes constellations and the placement of the eclipses changes for the next 18 months (and the flavor of Yellow Days) in September 2017 too.

WANT A SESSION WITH KATHLEEN?

*** If you would like a session with Kathleen to look at your personal chart to understand more about how the Green Days and Saturn and Mars may affect you this year, go to <http://consciouscalendars.com/coaching/> and get one of the **15 spots in June** that just opened up for the special.

You can always reach out to support@consciouscalendars.com or email Kathleen directly at info@kathleenwhalen.com for help with your Calendars or to learn more about the special of the month.

EXCITING JUNE

June details:

Venus changed constellations on May 31st, entering Aries, and helping create Green Days when the Moon is in Libra (Vedic Map).

On Yellow Days:
Stretch
Breathe
Stay clear of drama
Plan extra time for delays

June 1 & 2 Yellow Days

Thursday June 1 – The Moon is with Rahu in Leo and aligns with an abundant, romantic energy, but it's still a Yellow Day. This is the second of 3 Yellow Days in a row before our Green Streak June 3 – 6!

Take deep breaths and have a back-up plan just in case delays or obstacles appear.

The Moon is in Purva Phalguni for advanced student of Vedic Astrology (a region of sky that

www.ConsciousCalendars.com/mini-ccal

Copyright © 2017 Conscious Calendars

can be associated with the Union of the Gods and marriage, but is not a good wedding day while Rahu is in Leo.)

Friday June 2 – Moon is still with Rahu in Leo, continue to watch and not engage with drama. The Moon is now in Uttara Phalguni, which is more stable, and yet Rahu will still distract or stir the pot today. If you can start the day with a steady routine, you will be successful today!

* **June 3, 4, 5 & 6 Green Days** These Green Days have the Moon either WITH Jupiter in Virgo or in Libra (opposite Venus in Aries). These are all days filled light!

Saturday June 3 This is one of the most auspicious regions of the sky being connected with the Sun God (Savitur) and gives those born with this Moon a 'golden touch' of talent from above. This highly creative region of sky is doubly auspicious with Jupiter being in Virgo right now. (Tesla was born with this Moon afterall!)

Correction! Type I Light and Swift Day!

Aligned actions on this day are: Beginning travel or educational studies of any kind, devotional practices, **healing** and receiving healing therapies, learning languages or philosophy. **Real estate is favored on this day, buying land,** building houses, or laying a foundation. This day is good for opening a business, for commerce or sales/trade of any kind; acquiring or paying back a loan. The Moon is in Virgo in the region called Hasta.

Sunday June 4

Correction! Type II Soft, tender and romantic Day!

Connected with the star Spica in the constellation of Virgo, this is one of the most magical points in the sky. Also translated as "the jewel" (Chitra); those born with this Moon stand out, and have a magnetism to them.

Use this Green Day to extend beyond your usual boundaries, reach out to someone in person, or by mail. Go ahead let yourself be seen today! It's a day for flare that is about your expression of sharing what you enjoy in life.

Let your desire to serve others show today, the day will have an extra glow.

On this day Mercury also moves from Aries to Taurus, going into the house connected with Venus.

Monday June 5 Type II Green Day The Moon is in Libra now opposite a smooth flowing Venus. Today brings a sweetness. Reach out and connect with community or a group of friends, the harmony seeking Libra asks you to connect with something larger

than yourself. This is also a good day for design planning for your home or office since today's moon is connected with Vastu, or Indian Feng Shui.

Tuesday June 6 Type IV Green Day – Moving energy.

Make changes today of any kind to your routine, to your home or office or make significant purchases related to vehicles, bikes or transportation.

The Moon (Swati) is now connecting you with True wisdom of the arts, learning through art or music, beauty and knowledge. How can you either see live music, or connect with the arts today?

*****Today is the class Kathleen is giving on Abundance at 9 am Pacific Time!**

We will discuss the energy of Venus and Mercury and how the Green Days have changed and how to harness prosperity on any day.

**Join the event or listen to the replay:
<http://iTeleseminar.com/98513004>**

*** Friday June 9 Full Moon in Scorpio
Swim in your intuition, build power through collaboration.**

Today's full moon is to remind us that we can cultivate intuition EVERY day of the year. This full moon might be giving you deep insights from your dreams. It is important to allow some personal quiet time on June 8 – 10 for yourself, that is unhooked from all stimulus (from listening to music, or media of any kind) and spend at least 10 minutes just being. Then

you can journal for a few minutes, but let there be space before reading, writing or being engaged in something. Otherwise, the message from the deep ocean of your inner being cannot let its message bubble to the surface.

Relax in or near water around this full moon. Since Scorpio is like an ocean of subconscious knowledge, let yourself float in the sea of possibility and see what answers or creativity emerges. (possibly even 'floating' or visiting a sensory deprivation tank to help you unwind, and tap into deep meditative states.)

We know that spending at least 10 minutes a day in quiet contemplation develops intuition –that is established from Positive Psychology research. ([Want to know more about how to build intuition and luck? Check out Kathleen’s free ebook on Positive Happiness Habits](#)).

June 10, 11 & 12 “Purple Days”

These three days simply mean that the Moon is aligned with both **Saturn and Mars** which can make for some intensity in our days. Manage anger by getting enough exercise, (and fiber) and by being aware of these energies you can avoid arguments on these days, but just not “egging” any conflict on.

You do not have to be a doormat, rather you are like Wonder Woman dispelling negativity with your silence and Gang, gang, gang said silently.

Peace can be cultivated in the midst of conflict – it’s the only way we will ever have peace.

Purple Days will have new icons in the next re-design of the calendars. For now, I will refer to them as Purple Days, but they will only be listed in your PDF for subscribers and on the day itself on the Facebook page.

*** Saturday June 10 Purple Day and Jupiter goes direct! It is Saturn’s day,** and thankfully now that Jupiter is direct again, look to have court cases and advocacy situations to fall more on the side of Truth and trust in the law. Some answers you have been waiting for can now emerge over the next month!

If you have been consulting an attorney for anything, you can now gain more information, clearly than previously with Jupiter direct for months.

June 13, 14 Green Days – The Moon is in Capricorn these two days, receiving the steady influence from Jupiter thank goodness!

Tuesday June 13 Type IV Moveable Day Today is a day to LISTEN to the answers from the Universe, hear what conversations are going on around you, see what help you might get today. It is a day with moving energy – move things right along.

Aligned activities for both June 13 & 14:

- Buying vehicles or other methods of transportation, like bicycles or mopeds.
- Major changes are supported of work and home, so moving an office or home, or making changes related to profession or residence.
- Major life changes of any kind
- New routines, turning over a new leaf, or changing daily habits switch more easily on this type of Green day.

- Minor changes to gardens and landscaping: testing out new places for small plants. Making adjustments to high turnover crops in farming and large Co-op farms (like lettuce and strawberries).
- Changing your commute or the route to regular activity.
- Purchasing or launching a ship for transportation, like a ferry.
- Travel or leaving on a long journey is supported with this kind of green day, one that is connected with a major change in life, like travel in retirement or to research where you might live next.

Wednesday June 14 Type IV Moveable Day.

The moon today is often called "The drummer" (Dhanishta) and connected with the heart-beat of the cosmos, also called the Star of Symphony.

Today is more motivated than yesterday, which was more of a day for insights and learning and listening. Today is a day of making your own path by listening to the beat of your heart.

If you have been taking quiet time each day and writing down what you are Grateful for each morning, then your guidance will be strong today.

You might even write a little song!

Aligned activity: (see above)

June 15 & 16 Yellow Days The Moon is in Aquarius these days, and is connected with the healing moon mansion called Shatabhishak, which brings the light of the 7th chakra into your life. Since today can get a little ungrounded, remember to eat your regular meals at regular times, and you will be able to handle this Yellow Day and any technology issues that might arise. You might get some beautiful insights.

*** June 18, 19 & 20 Green Days**

Sunday June 18 Mild Green Day Type III – Fixed energy for today can have it feel a bit intense. So stay focused on building things by yourself, don't over-do-it on this day.

This is both a Fire Dragon and Water Dragon day (as Kenneth Johnson calls them) – so the alchemical nature of the Moon in water sign Pisces with the Grace of Jupiter's wisdom is going to point you in the direction of your "next step" today IF you let something go.

The less fixed You are, the better the day goes. Go with the flow today.

Aligned activity:

- Pour the foundation of a house
- Establish a garden or make a major change to some land.
- Plant trees
- Break ground or begin building a home, temple or church
- Marriage

- New stone work, fences and other installations of large, heavy materials that are intended to stay for long periods of time.

Monday June 19 (Type I for the U.S.) II (Europe and earlier)

A beautiful day any way you slice it because the Moon is connected with both a purpose filled Venus and guiding Jupiter.

Consider going 'on a date' to see art, music or wear new clothes today. It is a fresh and sweet day; try and enjoy the sweetness of life without needing to eat sweets (try a mango, strawberries or some well aged balsamic vinegar instead of dessert today). Let the sweetness of life revitalize you today.

Aligned activity:

- All kinds of learning; music, dance and drama, even learning about architecture and art are good on these days.
- Marriage ceremonies
- Dating or meeting new friends are good on these days. Acts of romance and gestures of love and care are well received on these days.
- Relaxing with friends
- Buying or wearing new clothes, and other pleasurable activities in life that replenish and give vitality.
- **And** Begin a trip or journey
- Start a major project
- Sports activities
- Receiving or giving healing therapies, medicine or remedies on these days are particularly beneficial for health.
- Open a business, have a grand opening, launch a product, have a launch party or celebration on this day is good for the company.

Tuesday June 20 Mild Green Day

Aligned Activities today:

- Begin a trip or journey
- Receiving or giving healing therapies, medicine or remedies on these days are particularly beneficial for health.
- Open a business, have a grand opening, launch a product, have a launch party or celebration on this day is good for the company.
- Major transactions in sales and trade and any mercantile operation moves quickly on these kinds of Green days.

- Taking on or repaying a loan or debt is very good on these kinds of Green days, the transaction will go smoothly and the debt is more likely to be repaid quickly.
- Educational studies of any kind, devotional practices, learning languages or philosophy. **Real estate is favored on this day, buying land.** This day is good for opening a business, for commerce or sales/trade of any kind.

Tuesday June 21 Saturn retrogrades back into Scorpio – setting a new tone for a VERY Mild Purple Day on June 22 & 23. This now changes the energy of Purple days since Mars and Saturn will no longer be edgy with each other.

Wednesday and Thursday June 22 & June 23 Mild Purple Days The Moon is in a special place of consciousness, so this helps off set the obstacles which might come on these Purple Days. Keep perspective.

Try saying a shortened Loving Kindness meditation throughout these Purple Days.

"I am safe and protected. Or May I be safe and protected.

May I be at Peace."

Friday June 23 Red Day

Yeah! Celebration, a mild Red Day or the turn-around energy of the year depending on where you live! Read on. This is the day before the new moon in June, and so for those in the northern hemisphere, it will not feel like too much a low energy.

On the other hand, those in the southern hemisphere – this will be the lowest energy day of your entire year. Yeah! Things start to really build from here. Rest well, eat simply and easy to digest food.

that has been bugging you for the past few months.

○ New Moon in Gemini at 10:30 pm Eastern Time EDT on Friday June 23rd or at 2:30 am UTC / 3:30 am BST London Time on Saturday June 24

New Moon is in a fierce and divinely discontent part of the heavens. Use this rough and tumble moon that likes to buck the system and do things their own way, to change something

Change something related to YOU, do not focus on someone else.

This new Moon (called Ardra) has a **laser like energy** to it with the Sun, Moon, sunrise, Mercury and Mars all aligned within the same 10 degrees of sky! Not that is some intensity that comes with what is normally a quiet time of the lunar cycle (and normally a gentle new Moon).

ALIGNED ACTIONS: This section of sky calls for strong clearing actions, like attacking bad habits. You might want someone to come over to your house and enact a BIG, DEEP clean of your home or office. Get rid of things you have not used, get rid of food or snacks that do not support your health and vitality. (Get an accountability partner, so you can help each other.)

This is a no pussy footing around Moon, and with Mars adding fuel to the fire, opposite a Saturn in smoldering Sagittarius, you really want to use this laser focus while you have it to get rid of the old patterns or stuff.

This can be a hot-mess Moon too, but it's calling is to survive and thrive despite the circumstances of life.

So, this New Moon helps you face the pain you might have been avoiding or allows you to grab your dark side and tug it into the light. Like a vampire which dissolves in the light, the actual clearing will be easier than the resistance you might have been having to just 'doing it' and getting rid of that bad habit.

Travel is definitely NOT recommended on this New Moon

Sunday June 25 – Hi ho, Hi ho it's off to work we go like a good worker and keep focused on the tasks at hand today. It could be a productive day. Be open to discovering some new product today.

The Moon is two days new and in an auspicious place (Punarvasu). There is just a lot going on today with the Sun, Mercury, Mars and Moon all appearing to be in Gemini today.

Monday June 26 – It's an auspicious in-between day, connected with a spiritual Moon. (Pushya) But it is not any kind of significant day. It is sometimes nice to just have "a day".

Wednesday & Thursday June 28 & 29 Yellow Days The Moon is with Rahu in Leo...so just keep on being aware of 'bumping into' dramatic narcissists on these days or someone who tends to go into drams or get distracted easily and do not gossip on these days! We all could be the scattered one, if we do not manage our energy well on Yellow Days.

Only open emails at specific hours in the day, and set your goals for the day the night before and review them the morning before you walk out the door. Otherwise, the day could be all over the place.

Do not bother to try and run errands on low lunar light Yellow Days like June 28 & 29. Keep an eye out for scattered drivers if you drive your own car.

Friday June 30 Mild Green Day

We are returning to the building of light Green Days now! This is a day that just barely has enough light to give it a mild Green Day. Work on behind the scenes projects and keep conversations short, but still use the good luck that is sprinkled throughout this day.

Jupiter graces this Moon which has seven days of lunar light and is in Virgo.

Aligned Actions:

- Pour the foundation of a house or of a company.
- Establish a garden or make a major change to some land.
- Plant trees
- Break ground or begin building a home, temple or church
- Marriage
- New stone work to your house or garden, fences and other installations of large, heavy materials that are intended to stay for long periods of time.
