

2018 Vedic Astrology Trends

tips & guide

What do the planets have in store for us in 2018?

There are 6 major things you want to know about the year

- Five Mega Red Days (two early in year, three in July/Aug 2018)
 - Jupiter shifts from Libra to Scorpio in October 2018
 - Challenging times with Mars & Saturn in Sagittarius
- Challenging times when Mars in Capricorn with the eclipse patterns
 - Gorgeous zones of Light with Venus, Jupiter and Mercury bringing Good Giving energies together for almost five months of the year.
 - 2018 ends with powerful Mars and visionary Jupiter set to shift our lives with problem solving answers. Engineering feats will herald 2019.

The year starts with Jupiter in Libra.

for 13 months from Sept 2017 – Oct 2018

There are zones of positivity and light and zones of challenge and intensity...

Zones of Beautiful, Positive forces:

March, April & May are some zones of great Light to use if you want to improve your patterns of creativity and receiving love.

September month of light into early October 2018

And the last two weeks of 2018 gather power, wisdom and engineering in ways that can help clean Earth's water supplies and our oceans and coral.

That is five months of zone of Light!

Zones of Challenge and Intensity:
Mars and Saturn
Mars with Ketu

Mars transit of Sagittarius and then Capricorn

It's an INTENSE End of Jan – mid Feb!

4: 12 pm AEDT Sydney

Jan 20, 2019 at 9:12 pm PT, 11:12 CT

OVERVIEW OF KETU IN CAPRICORN

All Yellow Days in Capricorn will now be with the influence of Ketu which propels us toward our spiritual practices (action is associated with Capricorn the 10th zodiac sign connected with Earth and work), while Ketu can also make for ungrounded days.

So, doing our practices or meditating or changing our expectations on these kinds of Yellow Days makes the day become lemonade, instead of filled with lemons on your road.

**The important months to watch out for
and plan to use the incredible Jupiter and
Venus energy over the next year are:**

Friday March 2 – March 26, 2018 Venus is in Pisces – in special relationship with
Jupiter

Sept 1, 2018 through Oct 11, 2018.

Venus, Mercury and Jupiter
March 2018

Friday March 2 – March 26, 2018

NOTE: Venus will be in Pisces and exchanged with Jupiter. Language of LOVE & Creativity. All Good giving planets are in good giving signs.

Re-pattern how you SPEAK & THINK about your own creativity and expression. How do you show someone you care? How do you receive kindness and compliments. New ways to send and receive LOVE are all resonant acts (while Venus is in Pisces while exchanged with Jupiter).

Venus in Pisces and Aries in March & April

Challenges that come every spring with Mercury in Pisces will be better through March 26 (Venus in Pisces).

And there are some incredible alignments in April 2018 with light, consciousness and fire!

March 26 – April 19, 2018

Venus in Aries, opposite Jupiter.
Planet of light, Venus, softens intensity.

POWERFUL 2019!

Comes from a reviving
of our oceans and water
at the end of 2018. We
are mostly made of
water after all.
